Professional Summary

Backend AI Engineer with experience in building and deploying scalable ML and GenAI services using FastAPI, Docker, and GCP. Skilled in ML pipelines, MLOps, CI/CD, and RAG-based applications and have deep knowledge of data structures and algorithms.

Technical Skills

Languages: Python, Java, C, SQL, Node.js

Software Engineering: Data Structures & Algorithms, OOP, DBMS, REST APIs, Microservices

Frameworks: Flask, FastAPI, PyTorch, TensorFlow, Scikit-learn, Streamlit

Cloud & DevOps: GCP (Cloud Run, Vertex AI), AWS (EC2, S3), Docker, GitHub Actions, CI/CD

Additional: ML, GenAI, RAG, Data Pipelines

Experience

Python AI Intern — OneDose, Jaipur

Jun 2025 – Sep 2025

- Engineered and deployed production-ready **Flask microservices on GCP** Cloud Run, establishing an automated **CI/CD** pipeline that accelerated feature rollout and improved API reliability.
- Developed an intelligent **OCR** correction system using fuzzy logic and the **Gemini 2.5 Pro API**, boosting **medicine-matching accuracy by 35%** and significantly reducing manual review overhead.

Projects

Chest Cancer Classifier

[GitHub](#)

MLflow, DVC, Flask

- Achieved high classification performance on the ChestX-ray dataset by designing and implementing an ensemble model with optimized image preprocessing pipelines.
- Engineered a **reproducible ML workflow using MLflow and DVC**, enabling deterministic, one-command experiments and eliminating setup inconsistencies for new runs.

Medical RAG Chatbot

[GitHub](#)

LangChain, RAG, GROQ API, Streamlit

- Developed a **RAG-based medical chatbot** achieving providing reliable and sourced answers to complex medical queries.
- Integrated the high-speed **GROQ LLM API** with advanced embedding-based retrieval, **drastically reducing model hallucinations** and improving answer consistency.
- Designed and implemented a streamlined **Streamlit user interface**, enabling fast, intuitive querying and real-time interaction with the bot.

Education

University of Engineering and Management, Jaipur

2022–2026

B.Tech in Computer Science and Engineering (AIML)

GPA: 8.62 (till 6th sem)

Bethuadahari JCM High School (WBCHSE)

2020–2022

Class XII — Percentage: 87.60%

Bethuadahari Girls' High School (WBBSE)

2018–2020

Class X — Percentage: 88.71%

Achievements

- Top **2%** — NPTEL: Python for Data Science [Certificate](#)
- Gen AI Foundational Models for NLP & Language Understanding (IBM via Coursera) [Certificate](#)
